

Pneumatic Brakes

MAGPOWR has a history of providing pneumatic brakes that ensure consistent tension on unwind applications. The Smart Brake couples proven pneumatic braking technique with a sleek design that allows for easy operation and preventative maintenance. Features of this brake are toolless pad change and pad wear detection.

The High Efficiency Brake (HEB) is a low-cost option to the Smart Brake. It fits a significant amount of torque and heat dissipation in a very small package.

Products Include:

[1][MAGPOWR High Efficiency Brake \(HEB250\)](#) [1]

[2][MAGPOWR Smart Brake](#) [2]

[3][UL and CE Approved](#) [3]
